For the first time, the Miami Country Day School Math Department is offering students the opportunity to work on skills that will directly target areas of weakness in the math ability. Through the use of computer software students can enroll to re-take sections of a course or just sign-up to refresh and/or master basic math skills. Did you complete an Algebra I course and feel you did not quite get the practice in factoring that you need to move ahead in math? Do you still struggle working with fractions even if you are in Calculus? Are you taking algebra II next year and want to ready yourself for linear and quadratic functions? If you can answer yes to any of these questions or if you have math questions of your own, then a MCDS Personalized Review Unit may be for you!

### How it Works

Students enroll in a one-week intensive review unit designed by both the student and teacher. Students receive a copy of the appropriate course software and complete units built around their particular need. While students work, a teacher will be available to discuss with the student any issues he/she may have. Once the unit is complete students should have a solid understanding of the particular skill they wanted to work on.

### Details

This on-campus, non-credit unit is available to all students in grades 5-11 that would like to enhance their math education with a review unit. Students will be required to be on campus for two hours a day over the week of June 14-18, 2010. Students may enroll in up to two review units at a cost of \$250 per unit.

For more information contact either Sandi Lewis at lewiss@miamicountryday.org or Dan Bronish at bronishd@miamicountryday.org.
