

# WOW!!

Spend a week doing what you love: **ART and SCIENCE!**

## **CLAY! CLAY! CLAY! We can't get enough of it!!**

(Grades 2-6) June 14-18, 9:00a.m. to 11:00a.m. Limit 8 students for lots of individual attention.

Get your hands into real clay from the good earth for two hours each day. Create hours of beautiful hand built objects from coil creations to masks to boats to animals, plaques and whistles. Directed projects as well as free choice work time. Glazes, paints, stains and air dried clay will also be used. Kiln fired work will be returned the last day. Mrs. Moyer will teach the class.

## **Sensational Science: Where Science comes to Life as We Build It!**

(Grades 3-6) June 14-18, 11:00-1:00p.m. Limit 8 students for lots of individual attention.

Join this exciting week long science workshop where students use real tools to build models from recycled materials. Experiment with creations such as race cars, rockets, catapults, mini-bots and mechanical hands all based on scientific principles. Work with experienced teacher, Miss Monique Moyer.

Note: these are a one week pre-camp courses.

Call Summer School Director Sandi Lewis today or register on line on summer school web site as soon as possible.
